

PanLep300 Dataset

Researcher Data Access Agreement

AGREEMENT MADE ON _____ (DD / MM / YYYY)

Between

Data Provider **Cantanhez Chimpanzee Project**
(hereafter “CCP”)

University of Exeter, UK **Data Recipient**
[Full name(s) of researcher(s)]
(hereafter “the Researcher”)
[Institution, Country]

Concerning

The use of the PanLep300 dataset (hereafter “the Dataset”) — annotated camera trap video data of wild western chimpanzees collected in Cantanhez National Park, Guinea-Bissau, West Africa — for the research purpose described in the accompanying Data Access Request Form and Annex 1 (hereafter “the Approved Purpose”).

This Data Access Agreement governs the use of all data modalities within PanLep300, including videos, extracted frames, bounding-box crops, SAM3 segmentation masks, leprosy classification and re-identification track-labels, CVAT annotation files, and associated metadata, provided for the period specified in the approved Data Access Request Form. Western chimpanzees are critically endangered under the IUCN Red List. The Dataset contains sensitive information, including the identities and disease status of individually recognised animals. Access is therefore restricted and conditional upon acceptance of the terms set out below.

The Cantanhez Chimpanzee Project hereby agrees:

1. to provide the Researcher with access to the data specified in the approved Data Access Request Form and to permit use of the dataset for the Approved Purpose and for the duration of this Agreement;
2. to discuss authorship on any resulting scientific publication(s) arising from the Dataset or from models or analyses developed by the Researcher using the Dataset;
3. that the Researcher may present research results at academic meetings or conferences, providing there is timely prior discussion with and written notification to CCP before abstract submission, and with due acknowledgement and co-authorship as agreed;
4. not to publish or disseminate unpublished data or results relating to the Researcher’s planned work to a third party, including on social media, within the timeframe of this Agreement, without the Researcher’s prior written consent;
5. not to initiate substantially similar research with another external party on the same Approved Purpose within the timeframe of this Agreement without first discussing and reaching mutual written agreement with the Researcher.

The Researcher hereby agrees:

1. that the Dataset is the property of CCP and shall be used solely for the research questions and purposes outlined in the approved Data Access Request Form and Annex 1; that any additional or extended research use of the Dataset requires prior written approval from CCP before that use commences;
2. to include co-authors on any resulting scientific manuscript(s) as decided by CCP, including key collaborators and staff who were substantially involved in data collection, fieldwork, annotation, or organisation;
3. to provide all co-authors with the opportunity to read and comment on any manuscript at least fourteen (14) days prior to any planned submission deadline, and to incorporate CCP feedback or to reach mutual written agreement on any points of difference before submission;
4. to formally acknowledge and give credit to the Cantanhez Chimpanzee Project, field collaborators, and named staff as directed by CCP in all publication, conference, and report acknowledgements, in addition to any co-authorship;
5. to cite the primary PanLep300 dataset publication in all outputs arising from use of the Dataset, as directed by CCP at time of access;
6. not to provide the Dataset or any portion of it, in original or modified form, to any third party during or after the timeframe of this Agreement without CCP's prior written consent;
7. not to share images, videos, annotations, or any other Dataset content on social media or any public platform without requesting and receiving specific prior written permission from CCP;
8. not to train, fine-tune, or evaluate any AI or machine learning model on the Dataset beyond the Approved Purpose, and not to release trained model weights publicly without CCP's prior written consent;
9. to store the Dataset only on secure, access-controlled systems as described in the Data Access Request Form, and to ensure that only the named individuals in that form can access the Dataset;
10. to notify CCP immediately (within 24 hours) in the event of any actual or suspected data breach, loss, or unauthorised access or disclosure;
11. to provide CCP with periodic email updates on the status of the work and, where applicable, the publication process;
12. to submit to CCP a cleaned copy of the final dataset used for all analyses, and a digital copy of any resulting publications, theses, presentations, or other research outputs, within the agreed timeframe;
13. that any manuscripts arising from the Dataset shall be discussed during the planning stage by all parties, with authorship agreed before drafting commences;
14. that should the timeframe of the research exceed that stated in this Agreement without completion of a manuscript or a mutually agreed written extension, CCP reserves the right to collaborate with other researchers on the subject, with co-authorship offered to the Researcher if any data analysis conducted under this Agreement is included in the resulting manuscript;
15. to delete or securely destroy all copies of the Dataset, including backups and derivatives, upon completion of the Approved Purpose or upon written request from CCP, whichever is sooner, and to provide written confirmation of destruction within 14 days.

Both parties agree:

1. that all data within the Dataset remain the property of the Cantanhez Chimpanzee Project, and that CCP will determine whether any data included in publications may be made publicly available on an appropriate platform, in accordance with journal data-sharing specifications, following acceptance of any scientific manuscript;
2. not to provide the Dataset or mutually developed materials to any third party during or after the timeframe of this Agreement without both parties' prior written consent;
3. that any alterations to this Agreement or to the Approved Purpose shall be discussed and agreed upon jointly and submitted in writing as a signed addendum before taking effect;
4. to uphold ethical standards in wildlife data governance, including respect for sensitive ecological information, compliance with all relevant fieldwork permissions and national legislation, and the avoidance of any use of the Dataset that could negatively affect wildlife, field sites, or project staff.

No Warranty

The Dataset is provided “as is” without warranty of any kind, express or implied, including but not limited to warranties of accuracy, completeness, fitness for a particular purpose, or non-infringement. CCP accepts no liability for any loss, damage, or cost arising from the Researcher's use of or reliance upon the Dataset.

Signatures

By signing below, both parties confirm that they have read, understood, and agree to the terms set out in this Agreement.

Data Provider — Cantanhez Chimpanzee Project

Signature _____ Print name _____

Date _____ Position / affiliation _____

Institutional email _____ ORCID (if applicable) _____

Data Recipient — Researcher

Signature _____ Print name _____

Date _____ Position / affiliation _____

Institutional email _____ ORCID (if applicable) _____

If applicable — countersignature of Supervisor / Principal Investigator confirming institutional responsibility for the Researcher's compliance with this Agreement.
